Software Engineer with experience in IT Automation, Cloud Technologies, Systems Integration, and Data-Driven Process Optimization.

EDUCATION

Pontificia Universidad Javeriana

Jun. 2026

B.S. in Ingeniería de Sistemas (Software Engineering)

Bogotá D.C., Colombia

- **Honors:** Awarded Meritorious Thesis distinction for "OWL: A Platform to Centralize Information of Investment Alternatives in Colombia".

Technical Skills: Python | JavaScript | TypeScript | Linux | PowerShell | AWS (EC2, Lambda, CloudWatch, S3, API Gateway) | Docker | PostgreSQL | ServiceNow | REST APIs | GitHub Actions | Power BI

EXPERIENCE

Avianca

Jan. 2026 - Present

Automation & IT Operations Engineer

Bogotá D.C., Colombia

- Designed and implemented cloud-based monitoring and incident automation workflows using **AWS CloudWatch**, **AWS Lambda**, and ServiceNow **API integrations**, accelerating incident response and improving operational visibility across critical infrastructure services.
- Led the implementation of secure enterprise integrations between ServiceNow, external **REST APIs**, and **Azure Key Vault**, automating identity-related operational processes and processing more than 800 requests monthly.
- Developed an automated testing validation workflow using **PowerShell** and **AI OCR** technologies, achieving 96% classification accuracy and reducing manual review effort by 88%, optimizing system reliability and eliminating manual processing bottlenecks.
- Built end-to-end data integration and reporting pipelines automating data exchange, enrichment, and consolidation across enterprise systems through **SFTP** workflows, relational data models, and transformation rules, processing over 5,000 records monthly while ensuring data quality and operational visibility.
- Designed executive and operational dashboards in **Power BI**, integrating data from multiple sources and developing analytical models that transformed operational metrics into actionable business insights.

Prana Incubadora

Jan. 2025 - Jun. 2025

Software Engineering Social Intern

Bogotá D.C., Colombia

- Collaborated with **cross-functional teams** to redesign and optimize core platform modules using Angular and TypeScript, improving application reliability and maintainability.
- Led the migration of the organization's web platform from Netlify to Render, reducing load times by 40% while improving scalability, maintainability, and deployment efficiency.

PROJECTS

Distributed Architecture & DevOps Automation | Docker, GitHub Actions, Linux, PostgreSQL, Prometheus

Jun. 2025

- Designed and deployed a distributed application environment with automated **CI/CD pipelines** using GitHub Actions and self-hosted runners across QA and Production environments.
- Containerized services with **Docker** and **Docker Compose** while administering Linux servers and PostgreSQL databases supporting application workloads.
- Implemented an observability stack using Prometheus, Grafana, Loki, and Node Exporter for centralized monitoring, log aggregation, and operational alerting.

OWL - Thesis | Angular, Python, Airflow, PostgreSQL, ETL, Web Scraping

Dec. 2025

- Designed and developed a full-stack platform that centralized, standardized, and compared Colombian Collective Investment Fund data, integrating web scraping, **ETL pipelines**, and workflow orchestration to automate data acquisition and processing.
- Transformed fragmented financial market information into a scalable data store for investment analysis, supporting data-driven decision-making and earning the Meritorious Thesis distinction.

ADDITIONAL

Certifications: AWS Certified Cloud Practitioner (Exam Scheduled: Jul. 2026)

Languages: English C1 (IELTS Academic), Spanish Native.
